A1000

The ASCO range of Alpha™ bus shelters were created with comfort and durability in mind. The use of high-quality aluminium ensures they are built to withstand the Australian climate.

Alpha™ Range

The Alpha™ range is proudly presented by the ASCO Group.

The Alpha™ range of bus shelters can be customised and integrated with existing infrastructure. Following a comprehensive project evaluation, we can offer a customised solution including alternative construction materials.

Alpha™ shelters are manufactured in Australia from Australian produced aluminum, ensuring we can meet changing project needs whilst supporting Australian businesses. All aluminium is supplied in a powder coated finish.

The Alpha™ range comes with a variety of customisation options highlighted below.

A1000

Alpha™ shelters are thoughtfully designed in accordance with the Disability Discrimination Act 1992.

Capacity: Standard bus shelters can accommodate four seated plus one wheelchair.

Standard

ASCO is a prequalified supplier to both the Municipal Association of Contract (PP4924-2016) and Local Government Procurement Contract (LGP308-3). We are Local Buy Pty Ltd prequalified (BUS267)

Have a question? Our knowledgeable team can advise on Australian Standards, DDA compliance, Vic Roads standards, OH&S and traffic management requirements.
